Core Skills

- C#, SQL, JavaScript, HTML, CSS
- .NET, ASP.NET MVC, WPF MVVM, jQuery
- Visual Studio, Git, MS SQL
- SOLID, Scrum

Education

BSc Hons Computer Science - University of East Anglia (2007) 2:1 Attained.

Experience

Safeware Quasar - Software Developer (11/2013 – Present)
Skills C#, ASP.NET MVC, SQL, HTML, CSS, JavaScript, WPF, WinForms

Developed existing web app for creating Safety Data Sheets (SDS) that includes over ten different modules designed to simplify the process of chemical regulatory compliance. Constructed a tool that processes chemical data from regulatory bodies into an internal reference database, this allows users to pull data for chemicals into an SDS from many regulatory bodies, instead of having to enter it by hand. Maintained internal company tools to help support team for scripting, data import and backup on customer databases.

Green Man Gaming - Software Engineer (03/2013 – 11/2013)
Skills C#, WPF, MVVM, HTML, XPath, Scrum, Jira

Worked on a desktop app for Playfire, a social network for gamers with over one million users, which allows them to track various gaming platforms onto one profile. The app scrapes account data from the specific gaming site, then uploads to the Playfire website. Developed a new module to extract data for the PlayStation Network allowing users to update their profiles with their PlayStation gaming progress. Helped in implementing a redesign of the interface, including restructuring custom controls and styling to be more maintainable.

See 360 - Web Developer (07/2009 – 02/2013)
Skills C#, ASP.NET, SQL, HTML, CSS, Flash, JavaScript

Developed and maintained ticketing and retail websites for football, cricket and rugby clubs. Initially maintaining around fifteen sites we had expanded to over thirty over a two year period, completely redeveloping the site in that time. Created a module allowing users to print tickets at home and gain entry using a barcode. Was the primary developer for internal content management system, which managed basic website content such as images and text.

Plumtree Group - Analyst Programmer (06/2007 – 06/2009)
Skills C#, VB, ASP.NET, WinForms, HTML, CSS, JavaScript

Initially developed solutions for data extraction and processing, taking data from scanned forms to inject to the document management system (DMS). I moved on to working on the actual DMS bug fixing and testing, then later helping to develop part of the infection control system. Worked on developing a custom version of the DMS for the Health Protection Agency. I regularly dealt with customer support, troubleshooting issues such as faulty scanners or problems with the installation.
